Citizenship & languages: Finish citizenship, languages: Swedish, English, Romanian and French.

Education

Linnaeus University

Bachelor of Science in Computer Technology — Computer Science

Expected Graduation: May 2027

Växjö, Sweden

- Relevant Courses: Introduction to Programming, Programming & Data Structures, Object-Oriented Programming, Algorithms and Advanced Data Structures, Database Technology, Web Development, Operating Systems, Software Design & Architecture, Software Testing, Project Courses in Software Engineering, Degree Project at Bachelor Level

Leadership experience

LNU Ai Society

Fullstack Developer

January 2026 – present

Växjö, Sweden

- Part of R&D Team.
- Led a team of five developers to build a RAG-system guidance bot in order to speed up VISA application process by around 30%.
- Participated in hackathons & events.

Strandnäs Skola

Student Assistant

May 2023 – Sep 2024

Åland Islands, Finland

- Supported students in grades 1–9, including special education, ensuring smooth learning and assisting with academic tasks.
- Taught Swedish, English, and beginner French as a substitute teacher, supporting 20–35 students per class and adjusting instruction to varied learning levels.
- Developed strong communication skills while fostering an inclusive, well-managed classroom environment across 40+ total sessions.

Projects

Kiosk App | *Source Code*

Java, PostgreSQL, JavaFX, Docker

- Created a full-stack self-service kiosk prototype with an intuitive interface and real-time admin panel, tested by classmates and instructors (30+ testers) to assess ordering speed and system responsiveness.
- Collaborated with 4 students in a Scrum team using Agile methodologies, serving as **Project Manager** in the final phase.
- Built using **Java, PostgreSQL, Docker** and **JavaFX** for a modular and scalable architecture.

Fitness Logger with AI Coaching(In development) | *Source Code*

Java, springboot, JWT auth, OpenApi, React

- A full-stack fitness tracking platform with secure JWT authentication, an AI chatbot for personalized gym and diet guidance, a nutrition database with macro lookup, daily calorie budgeting, strength-logging with weight progression, a workout-planning calendar, and data-visualized progress charts.
- Made with: **Java, Springboot** to implement over 10+ Rest APIs, **CORS, React** and used **MySql** to add over 200+ food items.

Personal Portfolio Website | *Source Code*

React, JavaScript, SCSS, HTML5, CSS

- A responsive personal portfolio website with over 4 accessible pages using **React.js**, integrating animations, map tracking with **Leaflet**, notifications with **React Toastify**, routing with **React Router DOM**, and an email service with **EmailJS**.

To-Do App | *Source Code*

React, Spring Boot, JavaScript, SCSS

- Built a to-do list application integrating a **Spring Boot** backend with **CRUD API** functionality and a **React** frontend.
- Implemented RESTful communication using **CORS** and demonstrated full-stack principles in data management.

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL, HTML5, CSS, C#

Frameworks & Libraries: Spring Boot, React, Node.js, PostgreSQL, Docker, Junit-Framework, Mockito, JaCoCo

Developer Tools: Git, Postman, Docker, MySQL Workbench, VS Code, IntelliJ IDEA, Visual Studio, Cursor, Google Antigravity, Chat-GPT, Lovable, Claude

Concepts & Methods: Object-Oriented Programming (OOP), RESTful APIs, Agile Development, Scrum, Software Testing, Database Design, Prompt Engineering
